Exceptions crash your program

How to throw exceptions

- throwing returns Nothing

How to catch exceptions

Define custom exceptions

```
val someValue = throw new RuntimeException
```

```
try {  
  // compute a value  
} catch {  
  case e: RuntimeException => /* value */  
} finally {  
  // block for side effects  
}
```

```
class MyKnife extends Exception
```
